Methodology

Comparable organizations were drawn from electronically filed IRS Form 990 returns and matched on sector (NTEE code), budget (a size-adaptive revenue band that tightens as the organization grows), and geography (same-state first, broadening only when too few peers qualify); every organization within the band forms the peer set. To compare fairly across regions and years, peer compensation is normalized to NC cost of living (BEA Regional Price Parities, 2023) and to the subject's filing year (CPI-U). The figure benchmarked is Form 990 Part VII, Section A, columns D + F — reportable pay plus other compensation, benefits, and deferred amounts (column F may include amounts from related organizations) — with the chief executive matched by role. Related-organization amounts (column E) and institutional trustees are excluded. Full methodology: peerbasis.org/methodology.

Sample, role match & sensitivity

PEER COUNT 24 organizations. Compensation range \$929–\$131,448; filing years 2022–2025.

SIZE BASIS Matched on total revenue (\$292,470); for reference, expenses \$348,947 and assets \$2,268,155.

ROLE MATCH Erin Parish Mitchell, reported title "*Executive Dir.*", benchmarked as Executive Director / CEO. The title maps directly to this role.

Sensitivity — the subject's percentile under alternative compensation definitions:

BASIS	SUBJECT PERCENTILE
Total compensation (D + F), cost-of-living + inflation adjusted — the PeerBasis default	75 th
Total compensation (D + F), as reported (no adjustments)	71 st
Reportable pay only (column D), adjusted	79 th
All sources (D + E + F), adjusted	75 th

If the percentile moves materially across these definitions, the result is sensitive to methodology choices, and the board should weigh which basis best fits its facts.
